Example of Case Study Based Question

The theme for World Children's Day 2021 was to help children to recover from interruptions and learning losses experienced through the pandemic in the last two years.

On this occasion our school organised different sports activities to encourage the students to indulge in physical activities. Students of different classes participated in it by taking part in different activities like Cycling, flat race, high and long jump race, lemon and spoon race, etc.

During 100m race, time (in sec.) taken by a group of students to finish the race was recorded as follows:

10, 33, 6, 26, 14, 25, 4, 23, 5, 39, 7, 15, 8, 26, 34, 8, 15, 26, 34, 14

Using the given data answer the following questions:

- (i) Find the mean time taken by a student to finish the race.
- (ii) Find the Mode and Range of the given data.

Q. Study the food web and answer the questions-

- (a) Name the producers in this food web.
- (b) Name two consumers.
- (c) List any two food chains that make up this web.

SAMPLE OF CASE STUDY BASED QUESTION

Q. Read the paragraph and answer the given questions-

Water is essential for all living beings. There can be no life without it. Water exists in three forms: solid, liquid and vapour. Though water is maintained by the water cycle, yet there is an acute scarcity of water in many parts of the globe. There is an uneven distribution of water. Much of it has resulted from human activities. Rapid growth of industries, increasing population, growing irrigation requirements and mismanagement are some of the causes for water shortage. We need to be worried about the wastage during the supply of water through pipes, the leaking taps in buildings and other places. Unnecessary use of water and overdrawing from groundwater should be avoided. Recharge of water to the ground should be increased. The need of the hour is that every individual uses water economically. Plants wilt and ultimately dry-up if they are not watered for a few days.

- Q1. What are the different forms of water?
- Q2. Write any two ways of conserving water.
- Q3. What are the causes of water shortage?
- Q4. What will happen if plants are not watered for a few days?

These forests are also called tropical rainforests. These thick forests occur in the regions near the equator and close to the tropics. These regions are hot and receive heavy rainfall throughout the year. As there is no particular dry season, the trees do not shed their leaves altogether. This is the reason they are called evergreen. The thick canopies of the closely spaced trees do not allow the sunlight to penetrate inside the forest even in the day time. Hardwood trees like rosewood, ebony, mahogany are common here.

- Classify the different types of forests.
-
- Where are tropical evergreen forests found?
- Why are tropical evergreen forests named so?
