Example of Case Study Based Question

The theme for World Children’s Day 2021 was to help children to recover from interruptions and learning losses experienced through the pandemic in the last two years.

On this occasion our school organised different sports activities to encourage the students to indulge in physical activities. Students of different classes

participated in it by taking part in different activities like Cycling, flat race, high and long jump race, lemon and spoon race, etc.

During 100m race, time (in sec.) taken by a group of students to finish the race was recorded as follows:

10, 33, 6, 26, 14, 25, 4, 23, 5, 39, 7, 15, 8, 26, 34, 8, 15, 26, 34, 14

Using the given data answer the following questions:

- (i) Find the mean time taken by a student to finish the race.
- (ii) Find the Mode and Range of the given data.

SAMPLE OF FIGURE BASED QUESTION

Q. Study the food web and answer the questions-

- (a) What do you mean by food web? [1]
- (b) Name the producers in this food web [1]
- (c) Give one example of primary consumer and secondary consumer in the above mentioned figure [1]

SAMPLE OF CASE BASED QUESTION

Q. The following question is Case/Source based question. Read it carefully to answer the questions that follow:

Water is essential for all living beings. There can be no life without it. Water exists in three forms: solid, liquid and gas. Though water is maintained by the water cycle, yet there is an acute scarcity of water in many parts of the globe. There is an uneven distribution of water. Much of it has resulted from human activities. Rapid growth of industries, increasing population, growing irrigation requirements and mismanagement are some of the causes for water shortage. We need to be worried about the wastage during the supply of water through pipes, the leaking taps in buildings and other places. Unnecessary use of water and overdrawing from groundwater should be avoided. Recharge of water to the ground should be increased. The need of the hour is that every individual uses water economically.

Plants wilt and ultimately dry- up if they are not watered for a few days.

- Q1. Water is renewable or non-renewable resource? [1]
- Q2. What is Water cycle? [1]
- Q3. Write any two methods of conservation of water [2]

The basin area has varied topography. The mountain areas with steep slopes have inhospitable terrain. Therefore, less number of people live in the mountain area of the Ganga-Brahmaputra basin. The plain area provides the most suitable land for human habitation. The soil is fertile. Agriculture is the main occupation of the people where flat land is available to grow crops. The density of population of the plains is very high. Since the cultivation of paddy requires sufficient water, it is grown in areas where the amount of rainfall is high.

- a) Name the world's largest delta. 1

Riya is a 12-year-old girl who recently started saving the pocket money she receives from her parents. She keeps her money in a small box at home but often worries about losing it. One day, her father suggests opening a savings account at a bank. Riya and her father visit the nearby bank. The bank manager greets them and explains the benefits of opening a savings account. The manager also explains how she will get a passbook to track her savings and an ATM card to withdraw money. Riya gets excited and opens her first savings account with ₹500 that she had saved in her box.

Questions:

1. Why did Riya's father suggest opening a bank account?
2. What are the benefits Riya will get from her savings account?
3. Imagine you are Riya—how would you plan to save money every month to grow your savings?
